

Serving the actual needs

A totally new concept: Flexibility

PolarBar offers you flexible and innovative solutions to best suit your needs for in-room refreshments. PolarBars "packages" and "options" enable you to build the best combination for your needs, matching the specific requirements of the hotelier.

The "Basic" Minibar: Still a lot to offer

- :: **Quality Assured:** Compliance certificates for each model, with high quality standards under ISO 9001:2000 certified design and manufacturing process.
- :: **Guaranteed Performance:** Each minibar is computer checked for guaranteed performance.
- :: **Usable Volume:** Inside rack heights are carefully designed to maximize utilization of inside volume.
- :: **Electronic Controls:** Ensuring very sensitive regulation of cooling.
- :: **3-Level Temperature Control:** Different cooling needs, avoiding confusion by 3 different preset levels of cooling.
- :: **Controls Hidden From the Guest:** Energy policy implementation is possible by placing the control panel away from guest access, while still easily reachable by hotel staff.
- :: **Smart Auto-Defrost:** Software controls automatic defrost, maintaining beverage temperatures during defrost.
- :: **Improved Cooling:** In-house innovations improving cooling efficiency.
- :: **Serviceability:** Improved ease of replacing serviceable parts/components.
- :: **Hygiene Made Easy:** Easily removable plastic parts for instant cleaning.

With our policies deeply engraved

QUALITY
For PolarBar, the quality of the minibars is the first goal. As a part of the ISO 9001:2000 quality system ensuring total quality, all minibars must pass severe quality procedures where every unit is tested independently. Sophisticated software packages are employed at several stages to avoid human judgment, ensuring quality consistency.

DESIGN
PolarBar minibars are created with design in mind, considering primarily the needs of the hoteliers for efficient usable volume, easy cleaning, easy servicing, and pleasant ease of use for the guests.

TECHNOLOGY
PolarBar minibars technology improves the cooling unit efficiency continuously through continuous innovation, an extensive use of electronic control is made to improve the efficiency of the total product, thereby also serving other needs of the hoteliers.

PRICE
PolarBar minibars are positioned in the market with the best quality/price ratio. The price is kept at an affordable level despite several extra features made standard on the product. The components used in the minibars are supplied by top-reputed multinational manufacturers.

ENVIRONMENT
PolarBar minibars complies with all environmental regulations around the world. Special emphasis is given to compliance with Montreal and Kyoto Protocols on "prevention of ozone depletion", as well as the phase-out procedures addressed by different administrations around the world.

WARRANTY
PolarBar minibars offer 1 year warranty. The VingCard Elsafe worldwide network ensures our high service standards around the world for technical support.

Flexible Packages

Package 1: The elegant door

Replaces a flat door that does not have a lock preparation, and that has solid grey plastic door shelves, with a curved door offering additional insulation, which comes with a lock preparation and see-thru ice-blue plastic door shelves. The plastic coated metal grid racks are also replaced with see-thru ice-blue plastic racks.

Package 2: Extended guarantee

The standard black coated cooling unit with standard heater insulation is replaced by silver-color hi-epoxy coating. Heater insulation is now covered by a plastic cover easing heater replacement, the cold aluminium plate inside is also replaced by a special design 2-piece cold plate.

Package 3: Elegant display

Available only for Glass-Door minibars, this package turns the interior into a shiny black color emphasized by chromium plated racks and door shelf. A 24-hr 12V LED inside lighting that comes in this package adds to the efficiency and the elegance of this new display.

Flexible Options

Lights

A 12V, "cold" LED light that adds to the functionality of the minibar. The light is door-activated by a push-button switch automatically. Comes in its elegant housing.

24 hour light

A12V, "cold" LED light, only available for Glass-door minibars with a on/off/dim selection switch for the guest, will turn your minibar into a 24-hr shopping window.

Lock

The lock comes with 2 keys. A convenience in rental applications, or to accommodate the guest's family needs.

Wheels

When relocation of the minibar is needed. A convenience for rental applications, and also for house-keeping cleaning needs.

Extra steel

Covers around the cooling unit in free-standing applications. The grid made in the lower and upper sides will contribute to desired ventilation.

Voltage	100/110/220/230/240 V	Color options	Black, grey & white
Power	60 W	Body	PVC coated galvanized steel
Thermostat	3-level electronic control	Cooling unit	Electrostatic powder coating
Defrost	Smart automatic defrost	Racks	Plastic coated metal grid
Opening directions	Right (reversible)	Door shelves	Solid grey plastic

On glass-door minibars, the vertical miniature holder is available on specific order, at no extra charge. The holder keeps its position when door is reversed.

Voltage: 100/110/220/230/240 V
