Comprehensive solutions from a world leader

UNION is part of the world leading ASSA ABLOY group, which comprises more than 100 separate companies in 40 countries throughout the world. This vast resource enables us to create total solutions throughout the residential environment. **UNION** has been at the forefront of world architectural hardware industry for 165 years. Through long-standing partnerships with people who use and maintain up-market residential properties, we have an in-depth understanding of real needs and a proven ability to develop products and system packages which match the diverse needs of this discerning market segment.

Totally integrated solutions for the up-market residential sector

UNION offers a wide variety of integrated solutions that meet the needs of high value individuals.

- **Security of individuals, communities and their valued possessions**

High security locks and lock cylinders for doors and security gates

- With restricted key duplication on production of authorization card
 - With anti-attack features e.g. jemmy-proof box keeps, hardened steel anti-saw rollers in bolts and anti-drill plates and inserts
- Locking accessories for windows and doors e.g. door and window security bolts, door viewers (peepholes), wishbone door limiting stays.

- **Convenience of key control (through Master Keying, Keying Alike, Electro Mechanical or Remote Controlled locking)**

- Mechanical pin tumbler lock cylinders of varying degrees of security available “master keyed” and “keyed alike” thereby reducing the number of different keys necessary
- Electro-mechanical pin tumbler lock cylinders offering high levels of security, varied and re-programmable keying options; audit trail technology interrogates keys and locks thus determining history of use
- Remote controlled lock and door handle sets offer keyless locking and unlocking

- **Aesthetically pleasing, fashionable, stylish door furniture**

Lever handles and knobs in a variety of materials and finishes to meet discerning tastes and complement varying architectural styles

- Satin chrome and bright chrome plated brass and zinc
- Polished and lacquered brass
- Brushed stainless steel
- Silver and limited colour anodized aluminium

- **Hi-tech access control solutions for pedestrian gates, primary entrances or entrances to secure internal zones**

- Electro-mechanical pin tumbler lock cylinders
- Remote controlled locking solutions
- Electric striking plates
- Maglocks
- Complete range of electronic keypads, biometric fingerprint and retina ID, magnetic strip, smartcard and transponder operated activators)

A partnership for total peace of mind

Involving a **UNION** residential specialist early in the design process will deliver benefits beyond a quality product specification, with **UNION** as part of your supply chain, you can be sure that we:

- Fully understand all your requirements
- Have the optimum solution – whatever the application
- Provide packages that meet all the necessary regulations
- Deliver solutions that have been thoroughly tried and tested in similar situations world-wide
- Will provide you with a lean supply chain ensuring maximum value for your investment

Proven Quality

Exacting tests and standards have been employed in the manufacture of all our products, earning **UNION** a worldwide reputation for quality, reliability and performance.

- Where applicable, **UNION** products are designed to meet or exceed CEN and/or SABS test requirements
- Accreditation evidence is readily available for inspection
- Products are manufactured in factories accredited under SABS ISO 9001 Quality Management Systems
